2.9) Overall, the instructor is an effective teacher.	Strongly Disagree							Strongly Agree	n=20	av.=5.5	md=6.0	dev.=0.8

# Comments Report

## 1. Background Questions

1.7) Considering your selections above, please comment on your experience in this course.

- Although certain concepts of the course were challenging, the layout of the grading scale and the assignment schedule were clear and fair.
- Dr. Oxley makes sure every student understands his lectures and answers any doubts one may have. He's very understanding and is always willing to help his students.
- Good experience in the course. The homework and reviews before the test are very helpful.
- I enjoyed my experience in the course and the instructor helped me understand lots of economic concepts.
- I have had a good experience in this course. Class has been fine, everything has been structured and organized. Assignments and tests have been manageable.
- I struggled at first getting used to the professors lecture style but that improved with time. I appreciate the method of grading when it comes to homework assignment and short papers along with the transparency that's provided with how we are graded. Professor Oxley is very helpful in his review sessions before exams and does well at making students feel like they should participating by encouraging it with extra credit.
- I think this is a great course!
- I took this class as a pre req for Econ and the env. Economics isn't my forte so I knew it would be difficult coming into it but it was harder for me to grasp than I anticipated. The style of learning is very different from what I am used to as in there are not really any discussions.
- I've enjoyed the course so far. Dr. Oxley has been a supremely accommodating and reasonable professor throughout the class. What I expected from the course is what I got.
- I've had a great experience in the course thus far.
- My experience with this course is that the workload is very manageable so you dont get behind fast. The grading standards for homework and tests are pretty reasonable and agreeable. Except on tests I believe live that students should be able to get claw back points on the short answer section of tests.
- Overall I've had a rocky experience in class. Near the beginning of classes I wasn't really understanding what was going on with the material we was learning. I had to watch a couple of youtube vidoes to get a better understanding of the work because i felt like in class things werent in depth as they couldve been. The homeworks were a big help though in learning concepts and definitely would say that Mindtap is successful.
- Professor Oxley will put forward any amount of effort necessary for a student to succeed. Although he's just getting the hang of things being a new professor, his course is structured very well and he does an excellent job getting content to students.
- So far it has been good. I was nervous taking a class with a new professor but layout has been very smooth.
- So far, I have greatly enjoyed this course even though it can be a challenge at times. The instructor has been so understanding in terms of deadlines and extensions, and is willing to help at all times for his students.
- This course has been very informative and the instructor has done very great work to ensure that to our best knowledge we are able to perform well not only on the tests but in the future as well.
- This course was very helpful so far to be able to learn economics again. I signed up for his macroeconomics class next year.
- i took this course for the major and was wary of it but i enjoyed this class

## 2. ECONOMICS DEPARTMENT STUDENT COURSE EVALUATION

2.4) Please comment on your answers to questions 2.1, 2.2, and 2.3.

- Dr. Oxley is always on time and is prepared to give his lectures
- Dr. Oxley is always super prepared and answers emails super quickly. The one instance where I didn't get great feedback from Dr. Oxley was on the first Economics writing assignment, where he said I had some instances of poor grammar and APA formatting errors, but did not point out where that was for me. As a first year, I never used APA in H.S., so I would've appreciated more context there.
- Dr. Oxley is very professional and reliable.

- Everything is organized and feedback is given on writing assignments and exams. Professor responds to emails and holds office hours.
- HW always says what is wrong and gives explanation. Has frequent office hours.
- He communicates well when he will be open for office hours and is very good with grades
- I do think that the professor is well prepared and that he knows his work . I also feel that sometimes the work is just read off and not so much explained.
- I never used office hours but they were always offered. Lectures followed a similar format each time. Grading was done clearly and deductions of points came with explanations and occasionally opportunities for remediation.
- I've never felt like Dr. Oxley was unavailable. I appreciated the responsiveness on email and the communication in that respect.
- Oxley is always available and gives helpful feedback on our tests.
- Professor always came to class well prepared and had very thought out lesson plan, gave good feedback on exams and was quick to respond whenever I emailed him
- The Professor is always reachable outside of the classroom and is very helpful with any questions I may have.
- The instructor is always fair, prepared and easily accessible which is always of great help to students so we appreciate that a lot!
- The very first class he showed us where exactly to find his office and provides consistent reminders of his availability outside of class. He shares his rubrics with us and explains them thoroughly.
- profesor answers emails promptly and helps students

2.7) Please comment on your answers to questions 2.5 and 2.6.

- Having taken similar courses in the past has limited the extent that I've learned (I knew virtually all of Unit I and half of Unit II coming in), but Dr. Oxley has still done well regardless of my knowledge of these concepts.
- I always feel prepared for the test.
- I can more easily observe questions from an economic perspective. Knowing these concepts improved my decision making with money and with general problems.
- I dont really feel im learning anything , i think im just memorizing week to week for the test. Although i can add that the work does make you think.
- I feel like most topics in this class are not really sticking with me. I think the lack of class discussion and maybe an over explanation of some topics may have contributed to this. As someone coming in with very little to no background in economics even the language that was used in this class made the learning concepts feel a little bit inaccessible.
- I have taken this course in high school so some of it is a review, but now just learning material to deeper extent.
- Learned valuable tools I can apply outside of just the classroom
- Most of the course material is prior knowledge from classes taken in high school but a lot of critical thinking is still used.
- The content is very insightful
- The course can be a heavy load since there's so much information to learn, but the professor makes his lectures carefully and are easy to understand.
- The course is challenging and the lectures can be long sometimes.
- This course is challenging but In a good way, it challenges me intellectually and helps me expand and broader my knowledge in the world of economics.
- This is a new topic to me and although it is not for others he does well at encouraging learning
- We do lectures over notes in class and sometimes we apply what we have learned from these notes by reading and discussing an article in class or doing an economics in the real world writing assignment which has us analyze something happening in the world and how it relates to our class.
- i did not have a lot of econ background but i enjoyed this course and learned a lot
- yes

2.10) Please comment on your answers to questions 2.8 and 2.9.

- Class is structured and organized well, assignments are clear and not too difficult. Lectures are bearable and sometimes have different variations to keep them engaging. Professor is understanding and gives chances for extra credit.
- Class was mostly easy to follow, but if you fell behind in a lecture it was hard to grasp the following concepts. Also it was hard to keep pace notes-wise with everything that would be on the exam.
- Dr. Oxley is excellent frankly! Other than one instance where he didn't give very esoteric and specific feedback, he's been perfect for me.
- Great lectures and content
- He is a good teacher and he effectively communicates the class material to students, answering any questions so everyone knows what he is talking about.
- I have enjoyed this course and professor prepares you well for exams.
- I have this class a low ish rating not because I felt as though the Professor didn't know the content or that he wasn't effective at teaching it but because for people coming into the course with different backgrounds, some material seemed like it was taught in a way not meant for them.
- My other explanations support this.
- Sometimes i wish that Oxley would slow down when writing things on the board but overall i enjoyed the class.
- The Professor was very diligent in teaching the class material in an effective manner.
- This course is great to all students regardless if you are an Econ major. The instructor has been amazing so far and is so caring and understanding towards his students as well as organized and prepared in all his lectures. I would definitely recommend this course to my fellow peers
- i enjoyed this class and enjoy my profesor
- yes
